A Complete Service
OUR FACILITIES ENABLE US TO SERVE YOU EFFICIENTLY

BIRD'S EYE VIEW OF OUR HATCHERY

The six greenhouses in this picture are one hundred feet long and cover a surface exceeding 15,000 square feet. We carry on hand many thousands of tropical fish and large collections of water plants, which enables us to make prompt shipments whenever weather conditions permit.

Our Aquarium Factory is located in the rear of these buildings. With large storage facilities we have a constant stock of all aquariums on hand, permitting us to give you prompt service. Our aim is always to furnish you with the better quality merchandise at lowest prices.

OUR SHIPPING DEPARTMENT, EXHIBITION BUILDINGS AND MAIN OFFICE
2141 CRESCENT AVENUE

Our Retail Store is open daily from 8 a.m. to 5 p.m. Saturday nights from 7 p.m. to 9 p.m. Sundays from 9 a.m. until 2 p.m. Closed on Holidays.

VISITORS WELCOME

Our location is 6200 West and 2100 North. Drive to 6200 Easton Ave., and go North on Kienlen to Bailey Place, one block West on Bailey Place. Via street car: Take any street car to Wellston and transfer to the St. Peters Bus. Get off at Crescent Ave. and walk one-half block North. Phone EVergreen 7265.

---------------------

When purchasing your breeding stock, it is of value to procure stock that is accustomed to your climatic conditions. It is always safe to transfer tropical fish from a northern to a southern climate. But stock grown under southern climatic outdoor conditions is a poor investment. Many of these fish get sick and die. Our fish are bred indoors where they live under conditions very much like they will in the average home aquarium. The results are much better than may be expected from outdoor Southern grown stock. When you purchase tropical fish from us you are dealing direct with one of the largest producers in the country. We are pioneers in this field and published the first Mail Order Tropical Fish catalog. Our aim is always to supply the utmost in quality. We have consistently adhered to the policy that we can serve you best by supplying quality at the lowest possible price. If you want large, full grown breeding pairs of certain varieties hard to get, write us, advising of size you want. We can supply fancy pairs, something that will reproduce, extra large show fish, etc., are always available.
COLLECTION No. 3

No. 1, Cardinal Fish (Chrosomus Erythrogaster), upper male
No. 2, Sailfins (Mollienisia Latipinna), lower male
Cardinals, per pair $0.50
Sailfins, per pair .75
Shipping can, 35 cents extra.

These fish can stand a temperature of 45° F. without injury. They can be kept with gold or tropical fish. We ship them all year round, but in extreme hot weather may postpone shipments. During very cold weather thermos shipping cans should be used. A $3.00 deposit is required on these thermos cans, which we refund. Sailfins are born alive. Cardinal fish lay eggs.

Special Collection Price
One pair of each $1.00
Three pairs of each 2.50

SPECIAL PANCHAX COLLECTION

Here is a collection of extreme interest for the advanced aquarist as well as the novice. Killifish are quiet and will, some times for several minutes, stand in the same position without showing a sign of life. When food is thrown into the aquarium they dart quickly and snap the food. They can jump after the food high out of the water. The aquarium should be covered with glass.

SPECIAL COLLECTION No. 7 Collection Price—5 pairs

| No. 36. | Panchax Panchax. Per pair | $0.80 |
| No. 38. | Pachypanchax Playfairii. Per pair | .80 |
| No. 37. | Panchax chaperi. Per pair | $0.80 |
| No. 39. | Chriopeops goodei. Per pair | .60 |
| No. 40. | Aphyosemion (Ribbon tail panchax). Per pair | $1.50 |
The gold helleri or swordtail grows similar in size to the well known Mexican Swordtail. It differs in color only. No. 2 and No. 4 show the variations in colors of the Betta from Cambodia (Cambodia is a small state near Siam in China). No. 3, the blood red moon is well known and is a live bearer, the same as the gold helleri. No. 5, Pearl danio, scientifically known as the Brachydanio albolineatus, more commonly known as the Mother of Pearl fish, is a native of India, very hardy and an egglayer. All of these species are ideal community tank fish and peaceful. Two Betta males however can not be kept in the same tank. They are also known as Siamese Fighting Fish.

No. 1. Gold Helleri. Pair $1.00
No. 2. Betta Cambodia. Pair 1.50
No. 3. Blood Red Moon. Pair 0.60
No. 5. Pearl Danio. Pair 0.30
Catalog Price $3.40

Collection No. 5
Special Collection Price $3.25
Shipping container extra.

This Collection can be kept in a five-gallon aquarium.

A FEW UNSOLICITED TESTIMONIALS

We are proud of the many nice letters which we receive from our customers, many of whom we have supplied with their needs for years. We take this opportunity to thank you all for the patronage and orders, and we extend our invitations to those who wish to be assured, that they will receive good quality merchandise at the lowest possible price.

Beldt's Aquarium:
A few months ago I ordered white worms and plants and was well satisfied.
WILLIAM GUNThER.

State Hosp., Ray Brook, N. Y., August 28, 1936.
Beldt's Aquarium:
The fish I ordered arrived safely and seem to be in excellent condition.
M. S. DONOVAN, M. D.

West Branch, Iowa, October 3, 1936.
Beldt's Aquarium:
Received fish 100 per cent alive and very much pleased.
E. M. KROUTH.

Knoxville, Tenn., September 30, 1936.
Beldt's Aquarium:
I wish to thank you ever so much for your promptness in sending my aquariums. They both arrived in good shape.
FRANK GALYON, JR.

Champaign, Ill., November 11, 1936.
Beldt's Aquarium:
A couple of months ago I ordered some tropical fish and supplies from you. I have been happily satisfied with this order. My black molly female bore some little ones and yesterday my female red platy had 24 little ones.
RALPH McCARTHY.

East Moline, Ill., September 14, 1936.

Beldt's Aquarium:
Fish came O. K. Not a dead or sick one in the lot.
MELVIN HILL.

Decatur, Ill., September 11, 1936.

Beldt's Aquarium:
The tropical fish were received yesterday in good condition and are very satisfactory.
R. E. McDANIELS.

Dolliver, Iowa, September 17, 1936.
Beldt's Aquarium:
Received my shipment of fish in fine shape and I am very pleased with them.
AGNES COLBY.

Madison, S. D., September 28, 1936.
Beldt's Aquarium:
Received my shipment of fish in fine condition with one exception. Thanks for the fine specimens you sent me.
ROY C. FISHER.

Steamboat Springs, Colo., October 12, 1936.
Beldt's Aquarium:
I was well pleased with the moss you sent. I have never received aquarium supplies that were as satisfactory as those you sent.
MRS. JAMES A. BROBECK.
SCAVENGERS FOR AQUARIUMS AND POOLS

Snails keep the glass from getting green, clams filter the water and clear it. Weatherfish feed on all kinds of refuse and keep the bottom clean. Salamanders and newts have some scavenger value but are primarily kept for interest only.

Glass Shrimp, transparent, about an inch long.
Each 15c Dozen $1.50

SNAIL COLLECTION
6 Red Ramshorn Snails, 6 Black Ramshorn Snails, 6 Red Australian Snails, 6 Japanese Snails.
All for $1.50
These collections are made up for fanciers who do not know the various varieties, mostly beginners, who don't know just what kinds to mix or how many to put into an aquarium. Each collection gives you the size of the aquarium in which these fish will thrive. If you desire to see these fish in natural colors, get our large 19x28-inch Color Chart. All of these collections may be seen on this chart illustrated in natural colors. We will mail this Color Chart for only 50c postpaid.

Collection No. 1—8 Pairs, $7.50
For 10-Gallon Aquarium
One pair of each breeding size: Dwarf Gourami, Blue Betta, Hy. bifasciatus, Panchax panchax. Melanotaenia nigra, Panchax playfairy, Black spotted red helleri, Orange side helleri.

Collection No. 2—13 Pairs, $8.00
For 15-Gallon Aquarium
One pair of each breeding size: Black Moon, Gold Moon, Blue Moon, Bloodfin, Guppy, Betta splenden, Hemigramus coudovittatus, Poecilia vivipara, Poecilia sphenops, Hy. flamedus, Limia nigrofasceatum, Barbus oligolepis, Polycanthus dayi.

Collection No. 3—4 Pairs, $5.25
For 3-Gallon Aquarium
One pair of each breeding size: Betta Cambodia, Blood Red Moon, Pearl Danio, Gold Helleri.

GUPPY BOWL SPECIAL $1.00 POSTPAID
One pair of guppy, one oxygen plant, 1 snail, 1 guppy bowl 3½-inch diameter, 3½-inch high, 1 package silver sand, 1 can fishfood. This guppy bowl collection sent postpaid anywhere in U. S. for only $1.00. During cold weather one pair medaka will be shipped instead of guppy.

TURTLE FOOD
Per can $0.15
GEOGRAPHIC TURTLES
Make ideal pets and are easy to care for. Each 25c 6 for $1.00 Postpaid.

No. 858—TURTLE TANK
Diameter, 6 inches; depth, 3 inches; opening, 4½ inches.
Price each $0.40

One of the most popular aquarium fishes. They bear their young alive and are very hardy. They are spotted when born and get black as they reach maturity. Prices are for jet black specimens. We can also supply 1-inch spotted Mollies at 20c each; 2-inch spotted Mollies at 35c each.

No. 16. Othocinclus vittatus (scavenger suction fish), pair 1.50
BARBUS COLLECTION
No. 1, Barbus Everetti; No. 2, Barbus Vittatus; No. 3, Barbus Ticto; No. 4, Barbus Semifasciolatus; No. 5, Barbus Conchonius; No. 6, Barbus Phutunio.

Barbus varieties are very popular and hardy. They are very lively fish and brilliantly colored and are well suited for the Happy Family tank.

Special Barbus Collection
One pair of each variety, 6 pairs in all. Price $3.00
Add 35 cents for shipping can.

MESOGONISTIUS CHEATODONS
SKIFFIA BILINEATA (Black Banded Sunfish)

One of our most interesting introductions of 1935. A live-bearer that does not look like a live-bearer. The female is silvery gray and has a blue-green arched line in center of body. The males have beautiful dark markings and the fins at times are solid black.

Prices
Pair $0.60 3 Pairs $1.50
6 Pairs $2.75

ORYZIAS LATIPES (China)

They are known also as Medaka. The color is light pale yellow. They are peaceful and best suited for the happy family aquarium.
Per pair $0.50 Per dozen $2.50

RAINBOW DARTER
The most beautiful colored native fish, can be shipped in cold weather only. They swim mostly near the bottom as they have no swimming bladder.
Per pair $0.75 Per dozen $3.00

MAILING TROPICAL FISH DURING THE SUMMER MONTHS
We issue a special list of varieties that adapt themselves well for mailing in small mason jars. Enough airspace is left in the jars and the jars are packed in cotton to prevent breakage. We tried this method of shipping last year with wonderful results. Needless to mention they can only be mailed during warm weather in June, July and August. If interested, send for our special summer list issued June 1. All fish in this list are quoted postpaid.
SILVER BRAND FISHFOODS

A good fishfood is essential to keep the fish in good health. Our "Silver Brand" fishfoods are the finest scientifically prepared foods for all aquarium fishes. We have years of experience breeding tropical and goldfish and inferior foods result mostly in sick fish, lost colors and run down conditions. Many fanciers are not aware of the fact that a poor fishfood results in diseases which no remedy will cure, because the fish are too run down to respond to any treatment. In many cases only a good fishfood is all that is required to bring them back to health instead of a lot of chemical preparations. Request your dealer to stock our foods and do not accept inferior brands made by people who never owned a fish in their lives. All of our high grade fishfoods put up in glass jars to keep them fresh and moist, do not contain any kind of filler such as meal or flour to produce quantity instead of quality. Most of these fillers produce constipation and the fish are soon run down and subject to all kinds of diseases. Stop using them and you will have better and healthier fish.

New Shaker Top Cans—$1½" in Diam. and 2¼" High.

SUBMERGED PLANTS
FOR THE
AQUARIUM

The health of the fish in the aquarium depends on the plant life therein to a large extent. A healthy plant growth will produce strong and vigorous fish. Vallisneria, Sagittari and Anacharis are the best oxygen producing plants and 50% of plants used in an aquarium should be these strong oxygen producers, the balance may be the less oxygen producing and more ornamental plants, such as Spatterdock, Cabomba, Ludwigia, etc.

Potamogeton Densus

Without question the finest plant for the protection of baby tropicals, especially live bearers. It will grow as a beautiful floating plant similar to Bladderwort; however grows much better and under average home condition is unquestionably the finest densely growing plant.

Per portion $0.25

Nephityus Liberica (Aquatic Arrowhead)

Will grow entirely submerged. Needs very little light.

One of the finest ornamental aquarium plants.

BELDT’S AQUARIUM, ST. LOUIS, MISSOURI

SUBMERGED PLANTS FOR THE AQUARIUM

No. 1, Marestail (Hornwort); No. 2, Water Poppy; No. 3, Anacharis; No. 4, Fontinalis Gracilis; No. 5, Sagittari Sinenis.

FLOATING LUDWIGIA

(It trails on the water surface)

Per bunch $0.25

SAGITTERIA GUYANENSIS

(Echinoderus radicans)

Each $0.50

OUR PLANTS MAKE FRIENDS

Try Our Nice Selections of “Better Greenhouse Grown Quality”

FONTINALIS GRACILIS

A popular plant for all around breeding purposes, it affords great protection to young live-bearers, also used for spawning all kinds of tropical fish, fairly hardy. Per portion $0.25

WATER POPPY

This plant should be planted in small pots which contain some garden soil. A little sand, about 1 inch, will keep the water clean. Can be kept in aquariums all year round, but should never be planted more than 8 inches below surface.

Each $0.15 Per dozen $1.00

HAIRGRASS

A dwarf aquatic, the leaves of which are light green and rounded, about 4 inches long. Per portion $0.25

BLADDERWORT (Utriculalrea Minor)

Per portion $0.25

MARESTAIL (Hornwort)

A bushy plant which is well liked for propagating live-bearers.

Per bunch $0.10 Per dozen $0.75

SPATTERDOCK

One of the most ornamental aquatic plants, foliage light green. The plant grows from a root similar to horseradish leaves, about 8 inches long. Each $0.15 Per dozen $1.50

FROGBIT

A similar plant to Water Poppy, the nymphaea-like leaves float. It propagates by runners. Each $0.25 Per dozen $2.00

MARSALIA QUARDIFOLIA

Resembles four-leaf clover. Each $0.15 Per dozen $1.50

NEW JAPANESE ROUND LEAF SPATTERDOCK

Each $0.20 Per dozen $2.00

CABOMBA (Washington Grass)

A popular aquatic with fan shaped leaves.

Per bunch $0.10 Per dozen $0.75

MYRIOPHYLLUM

A fine feathery aquatic plant which is very popular for spawning egglaying fish. Per bunch $0.10 Per dozen $1.00

LUDWIGIA

A very ornamental aquatic plant with round leaves, the undersides of leaves are red. Per bunch $0.15 Per dozen $1.00

FLOATING PLANTS FOR THE AQUARIUM

Pistia Stratiotes (Water lettuce) Each $0.10 Per dozen $0.75

Waterfern

Salvinia, per portion .10

Duckweed (Lemma minor), per portion .25

Water Hyacinth (Eichhornia) .15

Parrotsfeather .10

Nymphaea Dauben. This is a small water lily which will bloom small blue flowers if kept in sunlight .75

Special Ornamental Plant Collection

Philodendron . . . . . $0.15
Variegated Philodendron .15
Japanese Evergreen .50
Umbrella Palms .25
Complete as illustrated, all four plants only 1.00
PTEROPHYLLUM SCALARE

The most popular aquarium fish. Breeding pairs, the size of this illustration, can be supplied at $3.00
Smaller size, each 25c and up

INTERESTING BOOKS FOR THE FISH FANCIER

"Exotic Aquarium Fishes"
By WILLIAM T. INNES
Author of "Goldfish Varieties and Tropical Aquarium Fishes"

This 460-page book with 41 color plates and 290 black and white illustrations, is one that everyone interested in Aquarium Fishes should own. It contains only such fishes that have actually been imported, giving the popular name (if any), the scientific name, its pronunciation and meaning, the native habitat and a key reference to a world map, which is printed on the fly-leaf. There are also maps which show the world distribution of the 7 most important families of Aquarium Fish; 78 pages are devoted to Aquarium Management, Plants, Diseases, Enemies, etc. There are also sections on Wholesale Breeding, Collection and Transportation, Miscellaneous Information, and Rules for Fish and Aquarium Competition.

$5.00 Postpaid

LIVE FISHFOODS

WHITE WORMS (Enchytra)
Per portion $0.50 Large portion $1.00 Postpaid
To propagate white worms, fill a small box about 12 inches square and 12 inches deep with good garden soil to a depth of 8 inches; keep a piece of slate or glass on top to keep soil from drying. Keep dirt moist. Feed mashed potatoes, boiled rice, bread soaked in milk. See that all food is covered with dirt. Breeding temperature best between 50 and 75° F.

FAIRY SHRIMP
An ideal live food. They grow about 1/2 inch long and can be propagated in half barrels. Will eat any kind of fishfood. Portion enough to start for Breeding, including shipping can $0.75

LIVE DAPHNIA
Including Shipping Can $1.00
If you wish to raise your own daphnia, get a can of live daphnia and one package of our Infusoria Powder which is also used for raising daphnia. Complete directions with every package.

BRINE SHRIMP EGGS
Per carton 75c Postpaid
The eggs will keep indefinitely. Young hatch in 24 hours, and make ideal live food for tropica fishs. Full directions with each package.

TUBIFEX WORMS
A small reddish colored worm, similar to white worms. They will live under water for months, making it possible to feed your fish enough for several days if you are away.
Per portion 75c Postpaid

"TROPICAL FISHES AS PETS"
By C. W. Coates, New York Aquarium
A most authoritative value, containing a wealth of experience and advice, 226 pages. Price $2.00

"GOLDFISH VARIETIES AND TROPICAL AQUARIUM FISHES"
By Wm. T. Innes. 306 pages. 284 illustrations.
Sent postpaid in United States $4.00

"FISHES IN THE HOME"
By Ida M. Mellen. New edition, 177 pages, $2.00 postpaid.

"THE MODERN AQUARIUM"
By W. T. Innes. 30 illustrations, 64 pages, $1.00 postpaid.

"GUIDE TO THE STUDY OF FRESH WATER BIOLOGY"
By James G. and Paul R. Needham. 88 pages.
Price $1.35 postpaid

GOLD FISH
THEIR CARE
Also Describing "TROPICAL FISH"

Goldfish and Their Care

This 24-page booklet contains 20 illustrations and a beautiful two-color cover. It describes popular aquarium fish, plants, diseases and treatments, etc.

15c Postpaid
SHUBUNKINS (Calico Fish)

Shubunks are hardy and can be left outdoors in the pool over the winter the same as plain goldfish.

The Shubunkin is a very beautiful colored goldfish. No two fish are alike in color, in fact the two sides of the same fish may be entirely different colors, patches of red, black, yellow, green or blue are distinguished by a pearl background.

SHUBUNKINS

SPECIAL COLLECTION No. 22
12 Shubunks, 2-3 inches; 12 Goldfish, 2-3 inches; 6 Black Telescope, 2-inch; 6 Calico Telescope, 2-inch.
All 36 fish for $3.25
Including shipping can.

SPECIAL COLLECTION No. 23
25 Goldfish, 3-4 inches; 25 Fantails, 2-inch; 25 Shubunks, 2-3 inches; 25 mixed Black and Calico Fantails.
All 100 fish for $10.00
Including shipping can.

SPECIAL COLLECTION No. 24
10 Goldfish, 2-3 inches; 10 Fantails, 2-3 inches; 10 Calico Fish, 2-3 inches; 10 Black Telescope, 2-inch.
40 fish for $5.00
Including shipping can.

EUROPEAN SILVER ORFEN (Silver Trout)
Very rare, 2-3 inch fish, each $1.00

NEW VARIETIES OF FANCY FISH FOR POOLS
Golden Trout, 2-3 inches, each $0.75
Chinese Red Carp, 3-4 inches, each .75
Chinese Red Carp, 4-5 inches, each 1.00
Chinese Blue Carp, 3-4 inches, each .75
Chinese Blue Carp, 4-5 inches, each 1.00
Chinese Blue Carp, 5-6 inches, each 1.50
Three Color Carps, 4 inches, each 1.00
Three Color Carps, 5-6 inches, each 2.00

All of these fish get 12 inches long, are peaceful, and will mix with goldfish.

ORIENTAL COLLECTION
2 Golden Trout, 2 Red Carps, 2 Blue Carps, 2 Three Color Carps, all about 4 inches long.
Special price, including shipping can $5.00
BELDT’S AQUARIUM, ST. LOUIS, MISSOURI

FANCY GOLDFISH COLLECTION

I Calico Telescope 3-4 inches
J Veiltailmoor 3-4 inches
K Red Fringetail 3-4 inches
L Red Comet 4 inches
M Veiltail Calico 3 inches
N Lionhead 3 inches

One of each of these six beautiful Goldfish, as illustrated and size listed. Total $8.00
1 pair of each, total 12 fish. Special price $15.00

Special Scavenger Collection No. 3
3 Weatherfish, 6 Jap Snails, 6 Black Ramshorn Snails, 6 Red Ramshorn Snails. Price, including shipping can
These are hardy, same as goldfish. $2.25

Special Snail Collection No. 4
12 Japanese Snails, 12 African Snails, 12 Black Ramshorn Snails. These are all hardy and will live over winter same as goldfish. Special price, postpaid $2.50

Do Not Overlook the Scavengers When Ordering Goldfish—They Keep the Pool Clean
BELDT'S AQUARIUM, ST. LOUIS, MISSOURI

SEA HORSE

Sea horses can be bred and kept in captivity. Pair $5.00. Special folder containing all the information you need on this most interesting creature postpaid for 10c.

Extra fancy selected fish, according to quality, $1.00 to $2.00 pair.

All these various goldfish are hardy and can be mixed. Shipping cans for 25 small fish 35c each. For larger orders, send 60c additional for can. These cans are not returnable.

BELDT'S AQUARIUM: Madison, Wis., November 24, 1936.
The aquarium I received from you looks wonderful. The fish were all good. The Mollienisia had young two days after they arrived.
E. H. HELGESEN.

The tank I ordered from you some time ago arrived in fine shape and is just what I wanted.
JOHN PEMBERTON.

BELDT'S AQUARIUM: Moscow, Idaho, November 7, 1936.
I received a shipment of fish from you on September 19th. I was well satisfied with same and plan to buy more fish and supplies from you in the future.
MISS VIRGINIA JOHNSON.

BELDT'S AQUARIUM: Presque Isle, Maine, September 2, 1936.
I was surprised to receive such nice large scalare. We have always been more than satisfied with any fish that we have received from you.
MRS. L. T. CARTER.

LIONHEADS AND ORANDAS

Our illustration shows a six year old Oranda, with perfect head development. This hood does not take good form until the third year on fish about 3½ inches long and is absent on all younger fish.

For the elimination of Radio interference, to be used with any type of thermostat you now have.
HEAVY DUTY ROD IRON ORNAMENTAL ROLLER STANDS

Capacity 800 lbs.

These ornamental rod iron stands are designed for large aquariums with heavy duty, ball bearing casters with 3-inch wheels. The construction of these stands is very rigid; the legs are ½-inch square and not angles. With the aid of these stands aquariums having a capacity of 100 gallons may be moved about with ease.

Price for stands up to 36 inches long, each $9.75
37 to 48 inches long, each 11.25
49 to 60 inches long, each 13.50

Standard height, 30 inches

CHROMALOX AQUARIUM HEATER

110-120 Volts

This is a heater for large aquariums. Has an overall length of 12 inches; width 2½ inches. Will maintain a temperature of 75° F. in aquariums up to 50 gallons.

Three paramount virtues of the Chromalox heater: Sensitive, non-radio interfering, and sealed thermostat. Heavy brass tube chromium plated. Chromalox element. Waterproof mounting to keep drip water from getting into mechanism. The mounting must be kept above water level. Guaranteed for one year.

Price each $6.50

HEAVY DUTY ANGLE IRON STANDS

These stands are constructed with 1½-inch angle iron legs and fitted with special ball bearing casters with 3-inch wheels. They are designed to carry a capacity of 800 lbs. They are 30 inches high.

Stands up to 24 inches long, each $8.00
25 to 36 inches long, each 9.00
37 to 48 inches long, each 9.80
49 to 60 inches long, each 11.75

Roller stands for aquariums made with one-inch angle iron legs and ball bearing casters with 2-inch wheels. Can be supplied up to
24 inches, each $7.00
25 to 36 inches, each 7.75

CASTER DOLLIE

An all steel caster dollie designed for moving aquariums on which permanent casters are not desired. They are easily slipped under the stands or removed. Have Harvard Ball Bearings. Overall height, 2 inches; overall width, 5¾ inches. The heavy gauge steel frame is practically indestructible.

Price per set of 4, postpaid $2.80

Salem, Va., September 2, 1936.

San Francisco, Calif., June 4, 1936.

Beldt’s Aquarium:
Our fishes arrived in good condition and we are quite satisfied with them.
GEE GONG CO.
GUARANTEED ELECTRIC AQUARIUM HEATERS

No. 1. Automatic with pilot light indicator has a double socket and two heaters can be used thermostatically for two different aquariums if desired. Also two heaters can be used in one aquarium, that is if the aquarium has a capacity of 50 gallons or more, two heaters would be necessary to heat it efficiently if the very large aquariums are kept in cold rooms. Each heater will heat aquariums from 10 to 45 gallon capacity. This emersion heater is constructed with a special chromalox element. The element is guaranteed for one year. No. 1 outfit furnished complete with one heater as illustrated.

<table>
<thead>
<tr>
<th>Price</th>
</tr>
</thead>
<tbody>
<tr>
<td>$5.75</td>
</tr>
</tbody>
</table>

Additional heaters, each $2.75

No. 2. Automatic for tanks from 5 to 30 gallons.

Price each $4.00

No. 5. These heaters come in single watt for following size Aquarium. Don’t forget to state gallon capacity of your aquarium or wattage desired. We can supply them as follows: for 2 to 4-gallon tanks, 10-watt; 4 to 5-gallon tanks, 20-watt; 6 to 9-gallon tanks, 30-watt; 9 to 15-gallon tanks, 40-watt; 16 to 25-gallon tanks, 60-watt; 25 to 35-gallon tanks, 80-watt.

Any of these priced at $1.00

The heating elements in No. 2 and No. 5 heaters can be replaced when burned out. Price of additional elements, each 50c. Installation of elements very simple. Element in No. 1 heater guaranteed for one year.

ALL OF THESE AUTOMATIC HEATERS ARE FITTED WITH CONDENSER TO PREVENT RADIO INTERFERENCE.

SUBMERGED AQUARIUM REFLECTOR

This reflector is made to hang on the inside in the aquarium. It is five inches long and one inch in diameter. Besides light, it also produces a little heat which makes it very practical for tropical aquariums. Supplied complete with bulb, rubber hanger and rubber extension cord.

3 for 5.60

GLASS TUBE HEATER

These Glass Tube Heaters are supplied with waterproof tops, rubber suction hangers, and complete with plug and 6-foot extension cords.

6-inch heaters can be supplied in following wattages: 10-watt, 20-watt, 30-watt, 40-watt.

Price complete, each $0.85

8-inch glass tube heaters can be supplied in 40-watt, 60-watt, 80-watt. Complete as illustrated.

Each $0.95

Do not compare this new type glass tube heater to the old sand filled type. The glass tubes are strong and can stand 800° F. without breaking. The special micchrome element is entirely enclosed in copper which is rust resisting and a quick conductor of heat, giving this low priced heater all of the quality of a higher priced article.

JUST A WORD ABOUT TESTIMONIALS YOU SEE IN THIS CATALOG

We positively guarantee that each and every testimonial in this catalog is unsolicited and comes from customers who have bought from us and are otherwise unknown to us, except that they have written after receiving our goods simply because they were satisfied. Original copies of these testimonials are kept on file and may be seen at any time by anyone wishing to be convinced that they are genuine. We have never paid or ever listed in our catalogs a paid for testimonial.
WATCHMAN THERMOSTATS

These automatic heat regulators will maintain a range of proper temperatures for tropical aquariums and are set for about 75° F. Nos. 1 and 2 are fitted with pure silver contact points. All of these thermostats are fitted with hangers and water-proof extension cords.

No. 1—500-watt capacity, complete with outside control knob, will not interfere with radios. Has three-way plug attachment so that three heaters may be hooked to this one regulator. Size of glass tube, 8x1 inches.

Price $3.75

No. 2—400-watt capacity with inside regulator, also has three-way plug attachment so that three heaters may be used with this regulator. The glass tube has an overall length of 8 inches.

Price $1.85

No. 3—100-watt thermostat is designed for single heater units for aquariums up to 30-gallon capacity; the heat regulator is on the inside; the glass tube is 6 inches long. Price $1.00

A special condenser is provided with these thermostats to prevent radio interference.

Notice

When adjusting these thermostats, a fraction turn to the right increases the temperature and to the left lowers the temperature.
SUPREME AQUARIUM REFLECTOR

Will fit on any aquarium. Size 8½ inches long, 2½ inches deep, 3 inches wide. It is so constructed that one rubber hanger can be moved so that it may be used on either end of the aquarium or fastened against the back. They are furnished complete as illustrated with extension cord and 5-inch show case bulb.

Large size, each .35

MAGIC INFUSORIA POWDER

Size of Package, 4x2½ Inches

Beldt's Magic Infusoria Powder: One eight-ounce box is enough to produce fifty gallons of infusoria. When breeding egg-laying tropicals or goldfish, the young, after they are able to swim, must be fed on infusoria. All young live bearing fish can be fed on infusoria for about ten days. This powder, which is guaranteed to produce the best infusoria culture, should be on hand. In case you do have some egglayers to spawn, you will need these small infusoria microbes for food.

Price per can $0.35

MAGNIFIERS

For testing Infusoria. Put a drop of Infusoria water on a piece of glass, hold light underneath. If the culture is good there should be at least 50 microbes to the drop.

Price of Magnifier, each $0.25

SPECIAL OFFER

One large can of Magic Infusoria Powder with Magnifier $0.50

Complete directions to use this Infusoria Powder with the package.
AQUARIUM MANAGEMENT

Never use gravel or too many shells for the bottom of an aquarium. Food and refuse will accumulate among them, because fish and scavengers have no access to it. It will cause the water to spoil and be a source of fungus remedy to the water. Chemical aquarium testing kits will help you determine the exact acid or alkaline conditions and the chemicals coming with these kits help you to neutralize the water. Unless one intends to go in for breeding, scientifically prepared foods usually cover a most complete diet. Medicated aquarium balls will help to prevent acid conditions. Feed as much food as the fish will consume in about thirty minutes. Use the dip tube to remove excess food and refuse from the bottom occasionally. The glass may be kept clean with fine steel wool; small pieces of steel wool which may drop in the water are not injurious, but rather beneficial. Air pumps are a great aid for large community tanks. Many more fish may be kept in an artificially aereated tank than if you only depend on the function of plant life. Glass feeding rings are more necessary than most fanciers realize. How would you like your dinner spread all over the table? Feeding rings help keep the aquarium clean. Glass covers are necessary on all heated aquariums, they help to retain the heat; many tropicals also like to jump out. A few bushy floating plants such as Utricularia minor (Bladderwort) or potomogramon densiflora can be used to destroy fishlice in outdoor pools, they are hardy same as goldfish. Price of Tablets, 10c each; per dozen 75c; per 100, $5.00.

- 9 in. long, 7 in. high, each: $1.00

Extra fancy and beautiful formations, up to, each: $3.00

Ozark Coral is heavy and prices quoted are F. O. B. St. Louis. Try to get what you pay for. Don't patronize a dealer that knocks a competitor, because a select product, properly grown, with a view of quality, does not require such poor salesman ship. If you have a surplus stock of fish, do not sell them for less than you paid for them. Unscrupulous dealers will offer you so little. Rather give them away to friends who appreciate them much more.

\section*{MERAMEC SAND FOR AQUARIUMS}

It is very important to use the right kind of sand for the bottom of an aquarium. Meramec sand answers this purpose. White sand packs too tight and does not allow the roots of plants to grow right. On the other hand, if sand is too coarse, fish food and refuse collect among same, causing water to decompose and getting cloudy. Meramec sand is put up in the following size packages:

<table>

Prices F. O. B. St. Louis

We can ship Meramec sand via freight only if freight charges are remitted with order, as we cannot make C. O. D. charges for freight; however, we can ship Meramec sand via Express, Express charges collect.

\section*{FISH LICE TABLETS}

A newly discovered remedy that destroys hydra and fish lice. Use one tablet for each 8 gallons of water. Gambusia affinis, a small fish sold at 50c per pair, can also be used to destroy fishlice in outdoor pools, they are fond of them and eat them. Price of Tablets, 10c each; per dozen 75c; per 100, $5.00.

Gambusia affinis: A small cold water, live bearing fish, also eats fishlice. When placing about 6 pair of them in a pool the lice soon disappear. They are hardy same as goldfish. Pair: $0.50; 3 pair: $1.00; Dozen: $1.50; Shipping cans 35c extra

Potassium Permanganate: Destroys algae and clarifies green water in aquariums and outdoor pools. Also a good remedy for tailrot on goldfish. Complete directions with every bottle. 4-oz. bottle: $0.35 Postpaid

Turks Island Salt: A solution of two level tablespoonfuls of Turks Island Salt per gallon of water makes a tonic which is beneficial to all minor ills. Fish should be left in this bath for several days. Per pint ctns., $0.35; Per quart ctns., $0.50.
AQUARIUM PLANT POTS

PHILO, OHIO:
Beldt's Aquarium:
Your aquarium cement cannot be beat.
CHARLES O. BAKER.

THERMOMETER HOLDER
It keeps it where you can easily read it.
Price 10c By Mail 15c

BELDT'S AQUARIUM CEMENT
Complete—Oil, Powder, and directions. For repairing aquariums; ¼-lb. packages, 40c per package, postpaid.

F. O. B. St. Louis

BELDT'S AQUARIUM CEMENT
Fanciers desiring to build their own Aquariums will save money by sending for our cement. An aquarium is only as good as the cement. A good quality cement that holds up for years and will not dry up and crack.
Powdered Cement, per lb. $0.35
Gum Oil, to mix with one lb., per bottle .25
Add 10c per lb. for postage and packing charges.

For those who desire to make large aquariums or a number of smaller ones:
10 lbs. Aquarium Cement $3.00
One pint of Gum Oil 1.00

F. O. B. St. Louis

BELDT'S FUNGUS REMEDY
Postpaid, per 1-oz. bottle $0.50
F.O.B., per pint 2.50
F.O.B., per quart 4.50

This is the most effective remedy for fungus, tail rot, and especially ichthyophthirius on tropical fish. Symptoms: Folded fins, fish wiggle, and seem to be unable to swim, scratch themselves on sand. Tropical fish have tiny white spots on bodies—cotton-like growth. This remedy should be on hand as these diseases are contagious and spread rapidly. Complete directions with every bottle.
IMPORTED AQUARIUM ORNAMENTS

These ornaments are finished in beautiful natural colored china and should not be confused with cheap clay ornaments.

No. 27. Plant Pot. 4 inches diameter, 3½ inches high. Each $0.50
HOW TO BUILD A LILY POOL

The important points are the following: location, depth, expense, and size.

The location should be as much as possible away from very large trees. Water lilies thrive best where they receive a lot of sun.

A Pool Three Feet Deep Is Best

The depth of a pool is best at about three feet. The goldfish live over-winter easy in a pool three feet deep and this is very important. There are quite a number of fish that get too large to be kept indoors and if the pool is shallow they have to be kept indoors during the winter months. Also all hardy lilies and aquatics may be left right in the pool over-winter.

Our illustration shows the construction of a pool such as we use extensively for propagation.

A Sloping Wall Is Stronger

The side walls are built on a slant. This keeps the walls from breaking as the ice rises as it gets thicker and therefore, there is little pressure on the walls. This is a great point to be considered, not only as a safeguard against heavy freezing, but also it saves quite a bit of expense in construction. Absolutely no lumber is necessary to build these walls. The concrete mixture is poured right on the ground. It should be stiff enough to keep it from running. If the owner, however, desires a nice straight edge instead of an edge laid with rocks as our illustration shows all that is necessary is to lay 6-inch boards on top of the ground and space them in straight lines around the pool. Another frame of 6-inch boards laid inside of this completes the frame. After pouring concrete in same, a nice wall is obtained around the pool. The lily boxes can be made of concrete for permanence, or may just be wooden boxes. A retaining wall is built near edge of pool, about 1 foot deep and in this space, which is filled with garden soil, all various bog plants, such as Umbrella Plants, Arrow Heads, Parrot Feather, Thalia, Egyptian Lotus, etc., are planted. Various hardy lilies and ornamental grasses are planted near the edge to give the pool a natural and formal appearance.

An Empty Pool Breaks Easier in Winter Than a Filled Pool

Do not empty a pool in winter time if it is deep enough. The frost never reaches to the bottom of a deep pool and the water in same is a protection. When a pool is emptied the ground all around and underneath freezes. Frozen ground expands and when it settles in the spring it may cause the pool to crack.

Fish Can Not Be Put in New Pool

A newly constructed pool must be seasoned. That is when the pool is filled with water the first time, the water absorbs the lime contained in the concrete. This is fatal to fish and their fins get ragged in several days. It usually ends in fungus (a white cotton like growth).

How to Prevent Fungus in a New Pool

Fill pool with water, let it stand one week and empty it. Repeat this and after the third filling it usually is good for fish. A pool, however, may be painted with asphaltum enamel which we can supply for $1.25 per gallon. Asphaltum enamel dries in 24 hours and the pool can be filled, planted and stocked with fish. Asphaltum enamel also stops most slow leaks as it seeps into the porous concrete and another great quality to be considered, the asphaltum coating prevents algae or the slimy mosses from rooting in concrete. The water stays cleaner and does not get green so fast. Put it on thick. Every pool we use is prepared in this manner. We can furnish asphaltum enamel in one gallon cans for $1.25 each. Five gallon cans for $5.00 per can.

Concrete Mixture

Use three wheelbarrows full of gravel and two of sand. To this add one sack of cement. For a finish which should be one-half inch thick, use 1 wheelbarrow of sifted sand to 2 sacks of cement. All concrete walls and bottom should be 6 inches thick. If the sides slant no reinforcing rods are necessary.

Goldfish Feeding in Winter

If the pool is three feet deep, the goldfish, if left outdoors for the winter, should not be fed from the time the ice forms until it melts in spring. They become dormant and almost lifeless. If kept in the cellar over winter in tubs and in a cool place, feed twice a week. If they are kept in an aquarium in ordinary living-room temperature, they should be fed at least every other day, but never more than a little each day.

Cultural Directions for the Water Garden

Water lilies unlike the usual garden flowers, require no cultivation and very little attention. Once planted, they take care of themselves. A well constructed pool once planted needs no further attention except feeding fish and removing a few old lily pads that become yellow.

Hardy water lilies and aquatics, also Nelumbiums, may be left in the pool all winter, as long as there is one foot of water above the roots. In the vicinity of St. Louis 8 inches of water above the roots is plenty. In the northern parts of the country where the water freezes to a depth of 2 feet or more, the hardy lilies are taken in and stored in a cool place, the tubers are left in the growing boxes and have to be kept moist. About every three years the tubers should be divided and fresh soil should be added.

Preparing Soil

If good black garden soil is available no manure has to be used. Of course a little rotted cow or horse manure will
be found beneficial. However, it should be used sparingly for if used too heavy it will cause algae to develop rapidly and also cause the water in pool to turn green. Very good results are obtained with good black garden soil only. A nice clear pool all summer is worth something and perhaps more than a little larger flower produced with the aid of manure. Hardy lilies can be planted almost any time of the year. We usually start shipping tubers about April 1 as by that time they have developed leaves and this makes it easy to get them out of ponds. Most all aquatic plants are hardy, the tops which freeze off during the winter do not kill the plants and the roots will produce a new growth early in the spring.

**Care of Tub Garden During Winter**

Leave the tub full of water and leave all hardy plants in same. Put boards on top and heap leaves around and above boards to keep heavy frost out.

**Tropical Lilies Make Very Rapid Growth and Are Best Adapted for Artificial Pools**

This young tropical lily will surprise you. The growth they make is tremendous. Within four weeks after planting you will have a number of lily pads almost 12 inches in diameter and the first flower usually opens up four weeks after planting. One lily will produce as many as 100 flowers during the season and they bloom until heavy frost. Tropical lilies will make ideal cut flowers for the table and most of them are very fragrant.

**Care of Tropical Lilies**

Tropical lilies should be planted after June 1. They may be planted in large 12-inch flower pots or boxes up to 2 feet square and 1 foot deep. This all depends on the size of your pool. If it is small, use a smaller box. Tropical lilies develop in size according to the space they get. They are grown in 4-inch flower pots in the greenhouse during winter. In these small pots they do not get very large and the flowers they produce in the winter may only be 2 inches across. Whereas the same plant in an out-of-door pool during summer will develop flowers from 8 to 12 inches across.

**Planting Tropical Lilies**

Tropical lilies are planted the same as hardy lilies. Good black garden soil will produce a rapid growth. Of course, if clay is used it is best to work in about 20% of good rotted manure. Any kind will do, also pulverized sheep manure is very good. It is always good to put about 2 inches of sand or fine gravel on top of soil to keep the water clear. The boxes should be ready for receiving lilies and a little dirt is removed from center of box in which you place the young plant. Take care not to plant the tropical lily too deep, the crown should rather be slightly above surface. The young plant may drop all of its leaves the next few days after planting. Don't let this alarm you.

**WINTER CARE OF TROPICAL LILIES**

Our illustration shows a tropical lily tuber. The tubers may vary in size from 1 inch to four inches in diameter. Leave the tropical lily in the pool until ice has formed and killed the tops. Then take crown and also the small tubers you find mostly near the center, out of box. Throw these tubers in cold water in a bucket and keep them in cellar. The roots should be trimmed very close before the tubers are put in bucket, also the top growth. This keeps the water from spoiling. In about a week's time the tubers should be taken out of bucket and washed clean. Then place the tubers in a glass or enameled receptacle packed in sand; always see that there is some water above the sand. The tubers are resting now and should be kept at a temperature of about 60° F. near a window in the basement. They are left in this condition until about the middle of March. Now they are brought up in the sun parlor or living room and each tuber is planted in a small 3-inch flower pot in an aquarium filled with water. The small aquariums listed in catalog holding three gallons of water are well suited for their development. They should be placed in either southern or eastern exposure, no other exposure will do. They should be kept close to the window. It is a great pleasure to see the young plants develop from tubers. The tubers may rest for another month or may begin to produce a new plant at once. Our illustration shows a growth of three weeks after the tuber was placed in the sun for growing. Sometimes the young plant may die again and in this case the tuber will produce another plant. Sometimes a tuber will produce quite a number of plants. The best results are obtained usually with young or small tubers, the old tuber usually rots after the second year. It may be noted and interesting that the tropical night bloomers are easier propagated this way than most day bloomers.

The young plants produced by the viviparious day bloomers are hard to keep over winter unless you have a greenhouse. They will produce tubers as well as young plants from the leaves. And it is best to handle the tubers only. Tropical lilies should be planted from 4 to 6 inches below the water surface.
JUSt WHAT SHALL I PLANT NEAR THE LILY POOL?

This is a question which is asked very often and at times hard to decide. The answer is that such perennial plants that usually thrive along the banks of streams or ponds are best adapted for artificial plantings near the pool; the ground around the pool naturally is bound to contain more moisture, especially if the soil is light and loamy. We have listed on this page a few old favorites, with which you can carry out the desired natural effect. It is best to plant more in groups, so as to leave open spaces near the pool.

Blue Siberian Iris (Iris siberica)—Of easy culture and very free flowering, very good for naturalizing and planting near water.
Each $0.15  Per dozen $1.50

German Iris—Iris are ideal plants for edging or planting among rocks. Assorted colors.
Each $0.10  Per dozen $0.75

Blue Flag (Iris versicolor)—A tall growing iris, producing beautiful blue flowers, the sword-shaped leaves resembling the Japanese iris.
Each $0.15  Per dozen $1.50

Yellow Flag (Iris pseudacorus)—Very similar to blue flag, with large yellow flowers.
Each $0.15  Per dozen $1.50

Lobelia Cardinalis (Cardinal Flower)—A very hardy and attractive native plant, seen along lowland and streams.
Each $0.25  Per dozen $2.50

Blackberry Iris—A good iris for rock gardens; 18 inches. The leaves form a palmetto and the yellow flowers are produced on long stems. The seeds which resemble a blackberry give the plant its name.
Each $0.25  Per dozen $2.50

New Red Water Iris—A beautiful tall growing iris; flowers of deep red color; 24 inches.
Each $0.40  Per dozen $3.00

Dwarf Irises—Yellow, Blue, Orange, Purple, Dark Blue and White. This Iris grows about 6 inches tall; most ideal among rocks. Each $0.25  Per dozen $2.00

Water Lily Collection No. 15
Our Beauty Collection

A group of four popular varieties, fragrant and prolific bloomers that attract attention in every garden. A very pleasing color combination. Flowers from 8 to 12 inches across.

1. Omarana. Each $1.00
2. August Koch. Each 1.50
3. Mrs. Edward Whitaker. Each 1.25
4. Mrs. G. H. Pring. Each 1.00
Special Collection Price $4.50
Japanese taros, Umbrella palms, Water hyacinths, Egyptian paper plants, combined with the beautiful Mrs. Ward (Rose Star) Water lily, make an ideal combination for any pool. We offer this whole collection, one of each, for only $3.00.

These plants must be planted after June 1 when all danger of frost is past.

Separate Price of Plants

Each

Imperial Taro (Colocasia A. Illustris) $0.50
Violet Stemmed Taro (Colocasia violacea) .50
Egyptian Paper Plant .50
Umbrella Palm .25
Water Hyacinth .10

Mrs. Ward (Rose Star). A beautiful rose colored Tropical Lily, centered with golden yellow stamens. The flowers are carried well above water and are borne in great profusion 1.50

Special Collection Price of No. 16—$3.00

Hemerocalis make ideal border plants for the pool. They are very hardy plants and during the last few years have become very popular.

All Prices for Hemerocalis (Day Lilies) Each $0.25

Hemerocalis fulva, grows from 2 to 3 feet high with brick red flowers.

Hemerocalis flava, yellow day lily, grows about 2½ feet high and blooms early in June.

Hemerocalis Kwanso, Fl. Pl., deep orange, double flowering, 3 feet, July and August. Hemerocalis Dr. Regel, rich orange yellow, blooms in May and June, 18 inches to 2 feet.

Special collection, 3 of each (12 plants) for $2.50
Practical Plants Near the Pool

**Chinese Hibiscus** (aurantiacus and carmiratus)—Red and pink and white. Three wonderfully improved varieties, producing flowers about 10 inches across. Very hardy and equally at home in wet or dry soil.

Each $0.25 Per dozen $2.50

**Sedums**—These plants are great favorites and the green low-growing foliage is covered with many variegated colored flowers. They are very good for planting among rocks near edge of pool. Assorted colors and varieties.

Each $0.15 Per dozen $1.50

**CALLA LILIES**

Calla Lilies make ideal pool plants. Set them out in 6-inch pots so the pot is half submerged in water.

---

Norwood, Mass., July 17, 1936.

Beldt’s Aquarium:

Some time ago I wrote you that the water lilies I purchased did not "come" and shortly afterwards I was a bit surprised to receive a replacement shipment. This was a very fine thing for you to do and I much appreciate it particularly because I did not understand that you guarantee merchandise.

M. R. PERRY.

St. Benedict’s Abbey, Atchison, Kansas, July 30, 1936.

Beldt’s Aquarium:

I felt that I ought to write you about the plants and fish I ordered from you the early part of June. The plants all arrived in first class condition and all of them have been growing nicely. The three tropical lilies have been blooming continuously for about three weeks.

DAVID R. KINISH, O. S. B.

**NEW TRAILING ARROW HEAD**

This new arrow head throws out long runners, some getting as long as 6 feet. It has beautiful, deep green, leathery, arrow-shaped leaves. This plant is not hardy but can be equally as well used as a houseplant over the winter months. Very attractive in outdoor pools. Plant so that pot is half-way submerged in water. Price, each $0.35
Hardy Ornamental Grasses

Arundo Donax Variegata, a very strong growing grass, producing a broad green foliage with various white stripes, attains a height of 10 to 12 feet.
Each $0.50 Per dozen $4.00

Eulalia Japonica, this variety grows about 5 feet high with light stripe through center.
Each $0.35 Per dozen $3.00

Gynnerium Argenteum, pampas or plume grass. One of the best of all grasses producing very large silvery plumes on stems which grow about 8 feet tall.
Each $0.75

Eulalia Gracillima (Japan Rush), the narrow leaves are green with silver stripe in center (4 feet).
Each $0.30 Per dozen $2.50

Japonica Variegata, the leaves are striped green and white (4 feet).
Each $0.35 Per dozen $3.00

Phalaris A. Variegata (Ribbon Grass), creamy white stripe on green leaf (2 feet high), good for edging.
Each $0.25 Per dozen $2.50

Festuca Glaucua (Blue Fescue), the foliage of narrow leaves is distinct blue-green (2 feet).
Each $0.25 Per dozen $2.50

Hardy Ornamental Grasses are ideal for landscaping your water garden; they have a charm that fits in with the pool; they also provide a most pleasing background.

PENNISETUM
RUEPPELIANUM

Purple Fountain Grass Plumes, purplish, foliage deep green, 2 feet; very good for edging; not hardy.
Each $0.35
3 for 1.00

PENNISETUM
LONGISTYLM

Greenish white plumes, 18 inches. Foliage light green, one of the best for edging canna beds, etc. Not hardy.
Each $0.35
3 for 1.00

SPECIAL PRICE $5.00
Nelumbiums are hardy and they should be planted in one foot deep boxes filled with good rich dirt. The boxes should be about two feet square and the top of box about 6 inches under water.

Nelumbium Speciosum (pink variety), each $1.00
Potted plants can be supplied after June 1, each 2.00
Nelumbium Lutea (large yellow flowers), each 1.00
Potted plants can be supplied after June 1, each 2.00
Nelumbium Album Striatum (white flowers), each 2.00
Potted plants after June 1, each 3.00

Nelumbiums grow to about 4 feet high, flowers about 8 inches diameter and leaves from 10 to 18 inches across. They can not be shipped before May 20th.

Special Nelumbium Collection
One tuber of each variety for only $3.25
One potted plant of each variety for only 6.50

NELUMBIUMS (Egyptian Lotus)

"Lotus in my pool"

This photograph was sent in by Mr. Sam Caldwell of Nashville, Tenn. For larger pools having enough space for the planting of lotus (a box 24 inches square and 12 inches deep is sufficient) they can be highly recommended. They are very hardy and multiply rapidly. While many plants do not bloom the first year, quite often these will make several flowers the first season.

Cyperus Papyrus (Paper Plant)
Small plants, each $0.35
Large clumps, each 2.00

Hardy Bamboos
Bamboos are very ornamental and give that desired tropical effect. We list here the two best varieties.
Arundo D. variegatus, each $0.75
Arundinaria tecta, each .50
FLOATING PLANTS FOR THE POOL

See our complete list of floating and aquatic plants which can be used for indoor aquarium or lily pools on pages 11 and 12.

Parrotsfeather, a beautiful floating plant with long trailing green foliage. Each $0.10 Per dozen .75

Water Hyacinth (Eichhornia), the old fashioned favorite floating plant, native to Florida. Produces beautiful lilac-blue flowers. Each $0.10 Per dozen $0.75

Water Lettuce (Pistia Stratiotes), the velvet green leaves form a rosette. They love plenty of heat and partial shade. Each $0.10 Per dozen $0.75

Salvinia, a beautiful small floating plant which turns red when exposed to strong sunlight. Per portion $0.25

Duck Weed, an old favorite. The small foliage is also greatly relished by goldfish and acts as a tonic. Per portion $0.15

Peppermint. This plant thrives well in shallow water; 18 inches tall. Each $0.15 Per dozen $1.50

Water Snowflake

A nymphea like aquatic, large clusters of white blossoms are produced from center of leaves. Very hardy. Price each $0.25

Water Nasturtium or Water Cress. Thrives in sun or shade; ideal near a cold spring. Edible, hardy. Rooted plants. Each $0.10 Per dozen $0.75

This tub garden was planted the first week in June and the photograph was taken the last week in August. It shows the wonderful effects that may be obtained even in a very small space. Below are listed the plants used in this tub garden.

3 Ornamental Grasses, 1 Water Taro, 1 Chromatella, 3 Water Hyacinths, 2 Water Canna, 2 Oxygenating Plants.

WATER LILY COLLECTION No. 17
No. 1. Blue Star $1.25
No. 2. General Pershing 1.25
No. 3. August Koch 1.50

Special Collection Price for this Crown Trio, $3.75

These three Water Lilies photographed in natural colors are set against a background of natural color photograph of Blue Star Water Lilies in one of our pools. The Blue Star carries its flowers on strong stems about 2 feet or more above the water surface. Tropical lilies are fragrant, large and make ideal cut flowers.

Please Notice
Most of our tropical lilies will bloom at least one week after planting. Lots of them are shipped with flower buds so that you may expect an immediate effect. Too often customers insist on early shipments, which is a mistake based more on inexperience on the part of the water gardener. In the latitude of St. Louis, Tropical Lilies should never be planted before May 20. Allow us to ship your tropical lilies at proper planting time and you will never be disappointed with results.

MARMORATA
A lavender-blue day bloomer. A tropical lily with beautiful colored leaves. The color of the leaves is medium green with dark greenish-brown blotches. The leaves are an attraction as well as the large flowers which are produced in abundance.

Price each $1.25
TROPICAL WATER LILIES—DAY BLOOMER

BLUE COLORS

Caerulea Blue—Ancient Blue Lotus of the Nile, flowers four to six inches across, carried well above the water. Each $1.00

Henry Shaw—Named in honor of the founder of the Missouri Botanical Gardens. Flowers beautifully blue. Delightfully fragrant. Price each $2.00

William Stone—This is a beautiful and attractive deep blue purple lily. The flowers are 8 inches across and star shaped. Price each $1.50

*Mrs. Edwards Whitaker—The largest flowering day blooming hybrid from Ovalifolia and Castaliaflora. Colors in shades of light blue or dark blue. Price each $1.25

Blue Beauty—Deep blue, very fragrant flower, tender nymphaea, producing flowers six inches across. Very strong and prolific. Does well in small pools or crowded conditions. Price each $2.00

*Dauben—A well-known viviparous day bloomer. The small light blue flowers are produced freely. A good plant for small pools and aquariums. Price each $0.75

*Marmorata—This variety produces perhaps one of the most beautiful leaves of all tender nymphaeas. The leaves are medium green colored with large blotches and squares of brown. The flowers, which are 12 inches across, are blue on the first day they are open and gradually become lighter until they are almost white on the last day. Price each $1.25

Blue Star—A beautiful deep blue variety about 7 inches across, the flowers at times are carried 18 inches above water. A very strong grower and prolific bloomer. Each $1.25

Colonel Lindbergh—A deep caerulean blue variety producing flowers up to 12 inches across which tower well above the water. The oval shaped leaves are blotched with brown. Each $2.00

Ovalifolia—A large flowering light blue water lily. The flower is about 10 inches across. A very strong and prolific bloomer. Each $1.50

*Mrs. Woodrow Wilson—A hybrid produced from Mrs. Woodrow Wilson and Castaliaflora. A dark lavender-blue flower, 8 to 10 inches across. Price each $1.50

PURPLE SHADES

*August Koch—Produced in the lily pools at Garfield Park, Chicago, by Mr. August Koch. The flowers are purple lilac and the petals a pale violet color, 7 to 8 inches in diameter, open four to six days. Price each $1.50

*Panama-Pacific—A hybrid produced by William Tricker. The predominant color is reddish-purple and the stamens are yellow. Very fragrant and most prolific in blooms. Price each $1.50

Zanzibar Azurea—A beautiful purple-blue shade flower is produced on strong stems. Good plant for small pools, can stand lots of shade, very fragrant. Price each $1.75

WHITE

Mrs. George H. Pring—A new water lily, pure white in color, flowers 8 to 10 inches across. Very fragrant and prolific. Price each $1.00

PINK SHADES TO RED

General Pershing—A hybrid from Mrs. Whitaker and Castaliaflora. The pink flowers are delightfully fragrant and open early in the morning. Strong plants. Price each $1.25

Zanzibar Rosea—A delightfully pink shaded day blooming lily producing flowers about 6 to 8 inches across, very free flowering. Price each $1.00

Edward C. Elliot—This is another new lily, produced by the Missouri Botanical Gardens. The fragrant pink flowers are produced in abundance. Price each $1.00

*Mrs. Sawyer (Independence)—A new viviparous day blooming lily, the leaves are shaded with brownish red and the flowers are very deep pink. Very vigorous and free flowering. Price each $1.00

Rose Star (Mrs. Ward)—The flowers are carried well above water and get about 8 inches in diameter. They are of a beautiful rose-pink color with long golden stamens. Each $1.50

Gracillis Rubra (Red Star)—This star lily has wine red flowers which like the other star lilies are carried well above water. Price each $1.50

*All lilies with star in front of name are viviparous, which means that young plants are produced from center of leaves. Tropical lilies should not be planted until latter part of May, or early June, and they should only be planted about 4 or 5 inches below water surface.
NIGHT BLOOMING TROPICAL WATER LILIES

Victoria Crouziana—The leaves are 5 feet in diameter and the white flowers are 1 to 1 1/2 feet across. Should be planted in at least 8 cubic feet of dirt and requires a water surface of 100 square feet at least to bring it to perfection. Only for very large pools. Price each $10.00.

Lotus Dentata—The flowers are large and cup-shaped. The petals are white and pink tipped. A strong and vigorous grower. Price each $1.00.

Devonshire—Bright, rosy red flowers, 8 to 10 inches across, flowers well above the water. Price each $1.00.

Frank Trelease—The flowers are tyrian, pink with dark bronzy red leaves. Price each $1.00.

Juno (Dentata Superba)—A magnificent white night bloomer. Flowers from 8 to 12 inches across. The petals are wide open and give the flower a flat appearance. Price each $1.50.

Columbiana—A new red nymphaea of European origin. The red flowers are 10 inches across. Columbiana is a very prolific bloomer and one of the best red night bloomers. Price each $1.00.

H. C. Haarstick—A new hybrid produced by the Missouri Botanical Gardens. Its color may be described as a rare lavender pink. The large flowers are carried well above the water and at times attain a size of more than 12 inches. The reddish brown leaves are a beautiful addition. Without question the finest night bloomer. Price each $2.00.

Rubra Rosea—A native lily of India, producing rosy carmine flowers, 6 inches across. The flowers are star shaped and borne freely. Price each $1.00.

Omarana—Shaded pink in center and gradually diminishing in color until the tips are almost white. Flowers 6 inches across, a prolific bloomer. Price each $1.00.

Sturtevant—A beautiful bright red flower, 8 to 10 inches across, requires a large planting box for roots with plenty cow manure mixed in to bring it to perfection. Price each $1.25.

Emily Grant Hutchings—A pink shaded night bloomer which produces immense large cup shaped flowers. Price each $2.00.

Mystery—New night-blooming tropical lily, pure creamy white, produced through cross-pollenizing the H. C. Haarstick and the Juno. The formations of the flowers are exactly like the H. C. Haarstick except it is pure cream-white. The stamens are yellow except the base which is fire red, very strong flowering night bloomer. Each $2.50.

Missouri—A new and distinct large white flowering night bloomer. Flowers up to ten inches across and free blooming. Requires extra large boxes to bring to perfection. Each $2.50.

George Huster—A red night bloomer producing large flowers six to eight inches across. The leaves are of a dark bronzy red color. Very prolific. Each $1.50.

Mystery Collection—1 Columbiana, 1 Emily Grant Hutchings, 1 Mystery, 1 Sturtevant. All four for $5.50.

Egyptian Collection—1 Lotus Dentata, 1 Omarana, 1 Rubra Rosea. All three for $2.75.

Every pool should contain at least one of these varieties of lilies, as they bloom at nights when all other water lilies are closed; therefore, giving you flowers 24 hours of the day. We only list the finest new Hybrids produced.

This photograph was taken by Mr. William G. Schumm. La Porte, Indiana. Mr. Schumm is well pleased with the Egyptian Lotus he received from us, and he advises that he left the plant out in the water tub all winter without any protection.

Victoria Crouziana

Emily Grant Hutchings

Nelumbiums (Egyptian Lotus)
Water Hyacinths

Besides Water Lilies there are many smaller miniature plants that grow like lilies. Others float on the surface and some grow entirely submerged and produce oxygen. Include a few of these for practical purposes, as well as adding a little touch of variety.

Collection No. 10
1 Snowflake Lily
1 Water Poppy
1 Parrot's feather
1 Lizard Tail
1 Native Lobelia
Postpaid $1.00

Collection No. 11
6 Water Hyacinth
6 Water Lettuce
(Shell Flower)
3 Parrot's feather
3 Submerged plants
Postpaid $1.50

Collection No. 12
2 Anacharis
2 Cabomba
2 Ludwigia
2 Coontail
3 Water Hyacinth
Postpaid $1.25

HARDY LILY
Comanche
One of the best hardy lilies of changeable color opening with a rich apricot color changing to a deep bronze.
Each $1.00

HARDY LILY
Paul Hariot
The changeable colors of this lily are admired by everyone. Opening with light orange shades which turn to various pink shades.
Each $1.00

TWO YEAR OLD TROPICAL WATER LILIES WITH BUDS FOR IMMEDIATE EFFECT

Each year we carry over a large number of various varieties to the next season. These plants are extra large with many large leaves and buds and can be supplied at only 50c additional.
HARDY WATER LILY

Rose Arey

Without question the finest hardy pink. The petals are long and oval formed and uniform deep pink.

Each $1.50

Water Poppy

Shallow water plants add a decided touch to the pool. A pool properly planted with these plants does not look so artificial. A number of plants also thrive near the pool where the soil gets moisture from the water in the pool. If the pool is built on higher ground, there are ornamental grasses and other garden plants that can be used for backgrounds or the ends of the pool to complete a most perfect picture.

Collection No. 13
1 Arrowhead
1 Variegated Sweet Flag
1 Lizard Tail
1 Hardy Thalia
1 Pickerel Weed

Postpaid $1.35

Collection No. 14
2 Native Lobelia Cardinalis
2 Lizard Tail
2 Canna Flacida
2 Water Taro
1 Paper Plant
2 Cat Tails

Postpaid $3.50

Collection No. 15
3 Hemerocallis
3 Tiger Lilies
3 Regal Lilies

Postpaid $2.00

5 Different Ornamental Hardy Grasses

Postpaid $2.00

Collection No. 18
For Large Pools
12 Iris Versicolor (hardy blue flowers)
12 Oxygen Plants (all hardy)
12 Floating Plants (different, not hardy)

Postpaid for $3.75

Collection No. 17
2 Pickerel Weed (hardy blue flowering)
2 Thalia dealbata (hardy purple flowering)
2 Lizard Tails (hardy greenish-white flower)
2 Cat Tails

All 8 Plants Postpaid for $2.00

HARDY WATER LILY

James Brydon

This free flowering cup-shaped lily is of deep rosy crimson color and a very strong bloomer.

Each $1.50
SELECT AND RARE HARDY LILIES

PINK AND ROSE SHADES

Rose Arey—The color of flowers is uniform clear pink. Price each $1.50

Eugenia De Land—Flowers extra large, deep rose-pink, with yellow stamens. Price each $1.00

Marliacea Rosea—Flowers are large and deep rose-colored. Price each $1.00

Odorata Rosea—Beautiful pink shaded flowers from 4 to 5 inches across. A good strong bloomer which produces flowers well above the water. Price each $1.00

Helen Fowler—A pink shaded lily; a strong grower and prolific bloomer. Each $1.00

Rose Magnolia—A beautiful flesh pink colored hardy lily. A good bloomer. Price each $1.00

WHITE AND FLESH SHADES

Gonnere—One of the best whites, very durable and free flowering. Makes good cut flower $2.00

Albacandidisima—A new large flowering creamy white lily with full flowers. Each $1.00

Gladstone—Flowers 6 to 8 inches across, strong growing white lily. Price each $1.50

Hopatcong—Native white lily, very hardy and a strong grower. Price each $0.50

Odorata—Flowers are large white, a very prolific bloomer; the plants make rapid growth. Price each $0.35

Marliacea White—Same as Marliac Rose, except pure white flowers. Each $1.00

Morning Glory—An exquisite soft shell pink, one of the best for cut flowers. The blossoms are about 5 inches across. Each $1.00

Marliacea Carnea—A beautiful flesh colored variety similar to Morning Glory; a very prolific bloomer producing flowers in abundance. Each $1.00

YELLOW

Indiana—A beautiful changeable orange-pink hybrid. On the opening day the flowers are yellow and later change to deep orange and deep crimson colors. Price each $1.00

Marliac Yellow—Bright canary yellow. Price each $0.75

Yellow Pygmy—A small lily which is ideal for tub culture. The flowers, which are golden yellow, are from an inch to two inches across. Price each $0.75

Mexicana—A deep yellow lily with smaller flowers about 4 inches across. Ideal for small pools or edging in large pools. Each $0.75

Sunrise (Giant Yellow)—The largest and best of all yellow lilies, producing very large yellow blooms. Each $1.50

Flava—A beautiful small yellow lily with flowers about 4 inches across, carried well above water. One of the deepest yellow. Each $1.50
**MAGIC WATER LILY FOOD**

Beldt's Magic Water Lily Fertilizer and Plant Food

Has been perfected after years of experimenting. Magic does not foul or sour the water in your pool and leaves it absolutely free of foreign colors. In our experimental pools Magic Water Lily Food proved that flowers will double in size and that especially newly planted water lilies and all other aquatic plants will make as much growth in one month as they would in two months if planted in ordinary soil. Use 1 pint of Magic Water Lily Food to mix with 1½ bushels of soil. Complete directions with every carton.

1 Pint Cartons, each $0.35
5 lb. bags, each 1.05

**RED WOOD WATER LILY BOXES**

These boxes are shipped knocked down and can be nailed together by anyone in a few minutes. They are cut from durable California Red Wood and will last a life time under water. These boxes also make wonderful boxes for propagating white worms. Prices do not include postage or expressage.

**ASPHALTUM ENAMEL**

A new pool does not have to be seasoned if the pool is painted one coat of asphaltum enamel. The concrete walls must be perfectly dry when applying this enamel. Just give it one good coating, let it dry 24 hours and it is ready to be filled. Black asphaltum enamel also has the advantage of keeping algae from forming on the walls. We can supply this enamel in black, green and blue.

Per quart, Black $0.35
Per gallon, Black . 1.25
In 5 gallon cans, Black . 5.00
Per gallon, Green or Blue 3.75
Per quart, Blue and Green 1.20

We do not pay expressage on pool paints.

**COLORED LILY POOL PAINT**

We highly recommend Sealment Water Proof Paint especially prepared for Cement walls and lily pools. After testing many materials manufactured for this use we selected Sealment as the best. If Sealment is mixed properly and applied according to complete directions which are furnished with every can it will last as long as the pool itself and forms a part of the pool and not merely a surface coating. It is ideal for stopping leaks on pools. Sealment contains no poisonous chemicals, however, on account of lime content, pool must be seasoned with change of water before placing fish in same. Sealment Water Proof Pool Paints can be supplied in following colors:

Old Spanish White, Blue, Green

Price per 5 lb. can for all colors except green $2.00
Price per 5 lb. can, Green 2.50

Directions—Five lbs. of Sealment Pool Paint will cover 50 square feet. Sold only in 5 lb. cans and we can not supply this in any other quantity. You will find complete directions for use with every can.

South Connelsville, Pa., November 12, 1935.

Beldt's Aquarium: One of your tropical lilies (Lindbergh) was in bloom until Nov. 8, after several severe frosts; was certainly pleased with it.

H. E. WILLS.
SUNRISE
Without question the finest hardy lily. The flowers which are unusually large and cactus shaped resemble a yellow dahlia. It is of a uniform yellow color and surpasses all other yellow water lilies. A great feature is the unusual fullness of the three rows of petals.
Price each $1.50

WOODEN WATER TROUGHS

These Redwood troughs are ideal for putting goldfish eggs in to hatch or to bury in the ground for a small pool. They are coated on the inside with asphaltum so that they are absolutely waterproof and do not require seasoning.
Size 5 ft. long, 1 ft. high, 2 ft. wide.
Price each $7.50
Made from 2-inch thick Redwood.

TROPICAL WATER LILIES

H. C. Haarstick—A new night bloomer, which has flowers of beautiful shades of lavender-pink. Large plants will produce flowers of 12 inches or more in diameter. They are very strong growers and bloomers, and one plant will produce as many as 150 flowers during the summer months. The leaves are reddish-brown in color. A feature which makes it so much more desirable is that the beautifully colored leaves add greatly to the attraction of the pool. H. C. Haarstick should be in every collection.
Price each $2.00

SPECIAL COLLECTION No. 11
1 H. C. Haarstick and 1 Marmorata
Special Price $3.10
See Color Illustration of Marmorata on Page 41.

SPECIAL PREMIUM OFFER
For any merchandise ordered from pages 34 to 48 before April 20, 1937, to the value of $6.00, we will give absolutely free 1 hardy Lucidia Water Lily valued at $2.00 each.
General Directions to Customers

Forwarding—All shipments of live stock are forwarded via express; also all glass articles. We guarantee glass articles only if forwarded via express and in case of damage in transit will replace all articles gratis only if a bad order is obtained from express company and mailed to us. We do not pay express charges on replacements or on original orders. We do not guarantee live stock sent through mail.

We do not pay postage or expressage on any shipments. All price quotations in this catalog are strictly net F. O. B. St. Louis except on items listed postpaid. Do not remit any money to cover express charges as these are collected when the express man delivers the goods. If you desire items sent parcel post, make your remittance large enough to cover postage. We can not guarantee parcel post shipments against damage or loss.

Correspondence—We can not give detailed information concerning breeding habits, etc., of fish. In order to properly do so would require hours of writing concerning some of the varieties. Include with all inquiries a self addressed and stamped envelope.

Claims—We can not entertain claims unless they are made within 3 days upon receipt of shipment.

Cash with Orders—Please send sufficient money with order to cover the whole bill. We decline to ship "Collect on Delivery" unless 50% remittance be made to guarantee acceptance.

Shipping Cans—Orders for about two dozen fish or less are shipped in 35c cans which are not returnable. Except if you wish another shipment made you may return the old can prepaid. Goldfish are never shipped in thermos cans. Only tropical fish are shipped in thermos cans from Oct. 1 until warm weather. Also during summer Northern shipments to localities where nights are cold are benefited if shipped in thermos cans. A $3.00 deposit is required on thermos cans which we refund upon receipt of empty can, which must be returned to us express prepaid. Empty cans can be returned from anywhere in the U. S. for only 20c prepaid.

We Guarantee the Live Arrival of Tropical Fish All Year Around. Subject to following conditions. We will only cover losses in shipments if Express Company bad order report is returned to us, and also any dead fish received, must be returned. (Sprinkle a little salt on the fish and wrap in wax paper) so we may identify them, and replace them. We refuse to make any replacements however, unless lost fish are returned to us the same day shipment arrives, and bad order report is mailed to us, not later than three days after receipt of shipment. Our responsibility ceases when fish are delivered alive, and we do not guarantee results after arrival. We guarantee live delivery of tropical fish farther than 1000 miles from St. Louis, only during the summer months, June, July and August.

During cold weather customer agrees to get tropical fish from depot to avoid undue exposure to cold weather.

Shipping Season—We ship everything listed in this catalog all year around. During cold weather tropical fish are shipped in thermos cans. Goldfish shipments cannot be made during extremely hot weather, and we cannot guarantee the live delivery of goldfish from May 10 to October 1; however, we ship them all summer, when weather conditions permit. We reserve the right to delay orders, should weather conditions arise that may call for delays on shipments, and such delay, in no way, should be a cause for cancellation of orders.

Canadian Shipments—Obtain a permit to import plants from the Department of Agriculture, Ottawa, Ontario. Send us permit number. You keep original.

Non-Warranty—Various conditions, such as unfavorable weather, improper planting, etc., may cause poor results. We send out only first quality stock, but we give no warranty as to productiveness or description.

Selecting Tropical Fish—Not all varieties listed can be shipped in one can. Customers desiring only such varieties that can be kept together in one aquarium should order those marked * which are known as "Happy Family Fish."

Pairs—Quite often a fancier wishes to match odd fish in order to pair them. You can purchase either sex at one-half the catalog price as quoted for pairs, except Veiltail Bettas.

WHEN WRITING IN REGARDS TO YOUR ORDERS, BE SURE TO MENTION ORDER NUMBER.

MEDICATED AQUARIUM AND POOL NEUTRALIZERS

These medicated water neutralizers are necessary to counteract acid conditions in aquariums or pools. For aquariums, just use one at the time. If water is acid they gradually disappear, depending on the amount of acidity in the water. For pools, they may be used one for each 100 gallons of water. They do not injure plants or fish; they only help to keep the water fresh and from becoming too acid.

Price postpaid 6 for 50c; Dozen, 80c F. O. B. St. Louis, 50 for $2.00; 100 for $3.00
